

MICROSOFT PROJECT INTRODUCTION

Plan and track project schedules, resources and costs electronically.

By **SGS**

Prerequisites

Participants will need to be familiar with the Windows Operating System and be able to open, close and save files. Experience using Microsoft Excel is an advantage.

Expected outcomes

- Create tasks and manage task durations
- Create relationships between tasks, set constraints and deadlines and identify tasks on the critical path
- Understand the basics of resourcing
- Track a project that is underway

Who should attend

This course has been developed for project managers, coordinators or team members who need to track projects electronically.

Project Management Concepts

- Concepts of Project Management

Navigating Project

- The quick access toolbar
- Working with views
- Entering data – tables and forms

Create a project plan

- Defining 'time'
- Setting project start and finish dates
- Change working time – setting up calendars
- Modify the standard calendar
- Adding exceptions (holidays)
- Setting recurring holidays
- Create a new calendar

Setting up tasks

- Copy pasting data from spreadsheet
- Creating summary tasks
- Expanding and collapsing an outline

- Spell check
- Inserting rows to add tasks
- Adding milestones
- Formatting text

Task durations

- Entering estimated durations
- Task relationships
- Creating lead & lag time
- Working time vs elapsed time

Critical path

- Viewing the critical path

Task constraints & deadlines

- Not meeting a constraint
- Edit/ Remove a constraint
- Deadlines
- Assigning a calendar to a task

Printing and PDF

- Print preview
- Page setup options
- Create a filter
- Create a highlight filter
- Save as PDF

Resources

- Create a pool of resources
- Assign resources to tasks
- Resolving over-allocated resources
- Removing an assigned resource
- Assigning work to a different resource
- Changing a task relationship to fix overallocation
- Changing a resource's calendar

Project costs

- Variable costs
- Fixed costs

Tracking projects

- Create & set baseline
- Tracking gantt – view the baseline
- Entering progress
- Slipping behind the plan
- Creating new work
- Displaying progress lines
- Create a visual Timeline for reporting
